***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-7, 9, 10, 12, 13 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gatter.

Gatter shows a valve 3; carbonator 5; ice bin/first heat transfer coils 18; second heat transfer coils 24; control valve 27, 28; water source 11; water circuit 8 and out of 5; pump circuit having pump 10 and an inlet and outlet; fluid shunt from 28; flow control valve 21, 29, 28; closed loop with bypasses around the tank as seen in the drawing figure; and check valve 29.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 4, 8, 11 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gatter.

Gatter has been discussed above, but lacks mention of the speed of the pump. It would have been obvious to one of ordinary skill in the art to provide either a single speed or dual speed pump dependent on the desired flow rate of the beverage, the desired pressure, and cost considerations (a single speed pump would be less than a multi-speed pump).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hawkins, Tuyls et al., and Castillo show other circulating systems for beverage dispensers.
